SAFETY AND SECURITY

Advanced technology solutions designed to swiftly and effectively recognize, respond, and recover from an incident or emergency.
SDI has a 25-year resume of designing, deploying, and supporting integrated security technology solutions for large-scale, complex organizations.

Multiple Levels of Security and Technical Expertise.
SDI’s talented team of professionals range from former security executives to hands-on, highly certified field technicians. Versed in NIMS, SSI and Federal regulations, the SDI Team is staffed with industry experts who understand how information is inherently used in security operations. SDI’s knowledge of security best practices shapes our technology deliveries, giving our clients exactly the tools and information that they need to do their jobs exceptionally well.

Unmatched Client Commitment.
Vendor-independent SDI offers more than the typical product vendor who is motivated to sell their specific devices. SDI holds certifications and hands-on working familiarity with industry leading manufacturers, allowing us to recommend the best technical and most cost-effective solution for each unique client environment. The SDI Team brings the technical capacity to configure these vendor technologies to specifically serve a client’s unique operational requirements - and we are committed to doing what it takes to make the technology work as part of our clients’ routine and emergency response operations.

Mission-Critical Portfolio of Clients.
Some of the nation’s largest organizations in the US choose the SDI Companies to deliver reliable technology systems that are core to their security programs:

- O’Hare International Airport
- Los Angeles World Airports
- American Airlines
- Transportation Security Administration (TSA)
- Maryland Port Authority (MPA)
- South Carolina State Port Authority
- Department of Homeland Security (DHS)
- City of Chicago 911/Office of Emergency Management and Communications
- District of Columbia – Citywide Electronic Security System (ESS)
- Metropolitan Police Department (MPD)
- Chicago Fire Department
- Illinois Emergency Management Agency
- Chicago Transit Authority
- Washington Metropolitan Area Transit Authority
- Illinois State Toll Highway Authority
- Federal Reserve Bank
- Bank of America
- Daytona Speedway
- National Naval Medical Center (NNMC)
- Kaiser Permanente
- Virginia Tech University

SDI’s Federal GSA Schedule 84 contract provides federal state and local agencies with a means of procuring SDI’s law enforcement, security and facilities management solutions at competitive, pre-negotiated prices.

SDI approaches highly-critical security technology implementations with an initial CONOPS-based analysis, to identify potential impact across relevant IT, security, operations and facilities management disciplines. The resulting business requirements, standard operating procedures, and response protocols drive our technology delivery, ensuring reliable, cost-effective and responsive working systems from Day One. SDI specializes in:

Command Centers.
SDI offers turnkey technology implementations - from technology architecture to full technology deployment - providing a single point of responsibility for total accountability, rapid delivery and overall systems integration.

Situational Awareness Management Systems.
Using our proven SAMSON™ technology architecture, SDI delivers enhanced situational awareness across a client’s enterprise by integrating best-of-breed technologies - physical security information management (PSIM) and event management systems into a framework of legacy and new security and operational systems.

Digital Video Management Systems.
SDI’s SAMSON model drives the sharing of critical information, graphics and digital video data from all sub-systems to provide a common operating picture to all users giving them the information that they need to perform their job quickly - dramatically increasing efficiency and reducing response times.

Intelligent Video Analytics.
Building upon some of the most advanced and proven capabilities in today’s marketplace, the SDI Team delivers a wide range of analytics, including perimeter protection, license plate recognition and Ingress/Egress breach detection.

Identity Management/Access Control Systems.
Whether a new enterprise implementation or upgrading to biometric/smart cards, SDI offers turnkey deployment of the latest identity management systems, including innovative mobile/wireless biometric readers and integrated workforce management timeclocks.

Emergency Preparedness Programs.
SDI delivers Mass Notification systems, Reverse 911, evacuation plans/signage and First Response Command Plans.

Networks and Infrastructure.
SDI’s in-house networks team supports all advanced security technology deployments, to ensure high systems performance and to reduce implementation costs using existing networks or high-capacity, secure wireless infrastructure.

SDI deployed megapixel surveillance technology at airport checkpoints for the TSA, providing the agency with improved surveillance capabilities with fewer cameras, better forensic evidence, and a significant reduction in fraudulent claims.
About SDI

Systems integrator SDI delivers mission-critical technologies that ensure security and revenue generation for complex, high-value environments. With a 25 year corporate resume, SDI addresses the higher IT demands of critical environments to deliver zero downtime, enhanced security and risk mitigation strategies. From airports to banks to commercial properties, SDI delivers deep technical expertise and complex systems’ past performance, with an agile delivery model focused on complete customer satisfaction.
